

COLSF 7.5 VI

Received
DEC 19 1991
Superior Environmental

Minutes of Meeting
Colbert Water Sampling Committee
December 4, 1991

Present: Scott Fink, (b) (6), Bill Wedlake

I. SAMPLE RESULTS

The results for October and November are not all back yet. Laucks has been very slow on their turnaround time. It should be taking 2 to 3 weeks, but has been 4 to 5 weeks now. Bill said information he is given over the phone has sometimes been inaccurate. Problems include basically paper work mistakes and bookkeeping errors, so Bill is contacting the lab manager to discuss the problems.

II. (b) (6) WELL

(b) (6), so has asked the County to test for nitrates and bacteria when they do their normal testing. The well is 600 feet from the house. Bacteria samples were taken from both the well and house. The results are pending. Bill said there is no history of contamination.

III. MEETING REGARDING INSTITUTIONAL CONTROLS

The meeting consisted of mostly County people. Neal Thompson was also present. Most of the major concerns were discussed, but no decisions were made. Another meeting will be scheduled with the appropriate legal people in attendance.

IV. MISCELLANEOUS

(b) (6) requested information on two new monitoring wells (Landau). Bill said he would get her the information she needs.

(b) (6) also requested Engineering Draft Reports for the Colbert Landfill Remedial Action. Bill explained that it would be better to have the Citizens Committee request them from the Project Manager, Dean Fowler.

The Committee reviewed the Annual Sampling Plan for 1992.

NEXT MEETING: January 1992
